# Printer Color Purchases

IT Services Purchasing oversees printing color purchases. Multifunction printer cartridges are delivered automatically depending on use.

**Black cartridges**

IT Services provides for printing color for devices in staff and student use.

**Color cartridges**

Color printers' cartridge costs are directed to the user's cost pool. Color printing is very expensive. That is why we emphatically recommend making color printing on our multifunction printers.

Please note! A color cartridge set for a laser printer costs about 400-700 €, while an equal amount of black toner costs 100-150 €.
