

Metropolia Network Drive Service Outages on June 30, 9:00am-6:00pm

Metropolia storage system will be under maintenance on Tuesday June 30, 2014 9:00am-6:00pm.

Due to the maintenance there will be two service outages, each one lasting about 10 minutes.

The drives will be reconnected automatically after the outage.

If network drives do not show on your computer in about 15 minutes after the outages begins, try rebooting your computer before making a service request (<http://hd.metropolia.fi>).

Due to the maintenance nearly all Metropolia systems will run on a lower capacity.

Because of this you will have to wait longer when using IT services.
