

# Improvements to the workspaces of the Tube

The most of errors are now handled and the first minor improvements are at hand. We updated the Tube yesterday. The update lasted longer than anticipated due to other maintenance tasks performed concurrently - apologies for that.

The update improves the following Tuubi Workspaces features:

- the Workspaces listing on the frontpage shows all active course workspaces
- the listing now shows changes made to the documents in the Document-tab.
- user interface and usability improvements in the Document-tab as well as in the Assignments-tab
- also fixes of misfunctions in Workspaces functionalities

## Development suggestions

The plentiful development suggestions and needs and how to participate in the evaluation of those will be covered in another announcement today Friday 8th.
