F-secure will be updated on staff computers

F-secure will be updated to version 9.11 on all staff computers.

After the installation your computer will REBOOT after two hours or you

can reboot it yourself after saving your current projects.

After reboot you must wait for 5 to 10 minutes when F-secure updates

itself. Email, network drives etc will not work during this process.

If your machine doesn´t work after short time and reboot, contact

helpdesk https://hd.metropolia.fi or call **020 783 6969**.
