

Find Computer's IP Address

Using browser

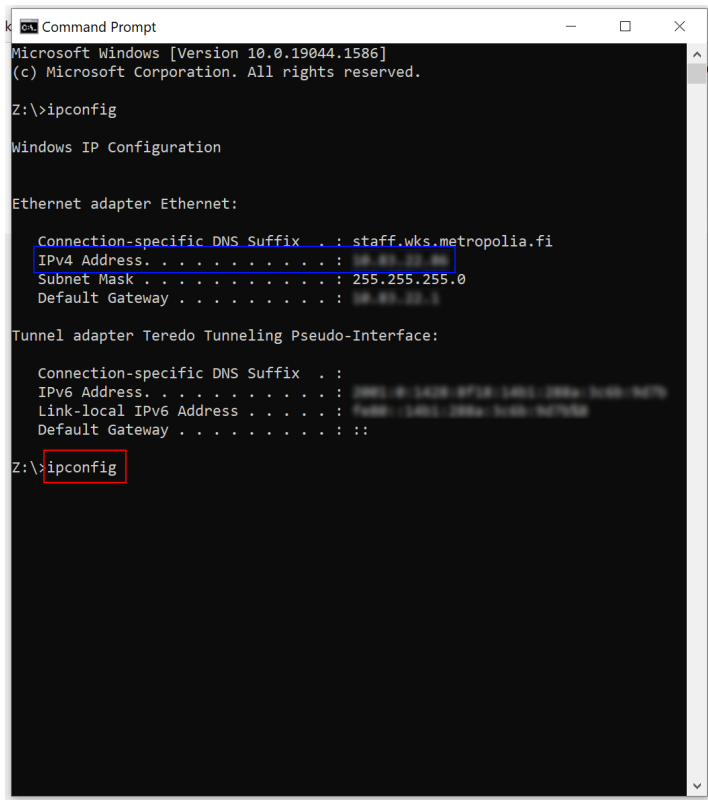

Browse to ip.metropolia.fi

Using Command prompt

1. Open the search field in the bottom left, type **cmd**, and open Command Prompt from the results:

2. In Command Prompt window, type **ipconfig** and press **Enter**:

3. As shown in the picture above, the address can be found next to IPv4 Address (you may have to scroll up the window) and is of the form 10.xx.xx.xx.

Did you encounter a problem?

Unable to render {include} The included page could not be found.
