

Print Monitoring

The multifunction printer system reports printer usage monthly to system administration. Monitoring plays an important part when printing services are developed by the following means:

- Finding the right locations for the devices
- Choosing devices that best meet printing needs
- Managing printer usage with environmental responsibility in mind
- Cost savings
- Introducing new printing practices

Printer usage figures

	2013	2014	2015	2016	2017	2018	2019	2020	2021
EDU	1 968 049	1 778 411	1 408 445	1 271 804	1 051 603	828 497	547 609	276 050

BW %	76,24 %	79,70 %	79,09 %	78,12 %	77,02 %	76,07 %	74,28 %	66,24 %	69,35 %
DUPLEX %	67,48 %	67,34 %	71,98 %	71,05 %	63,95 %	61,14 %	57,84 %	52,79 %	51,29 %

On the average, each staff member used to print 5000 pages per year. In 2020 the average had fallen to approximately 900 pages per employee.

If individual printing figures exceed the average considerably, a meeting between the user and IT Services over printing practices may be in order.

The goal is to find ways to reduce paper consumption and increase the use of electronic tools.

Users can view their own printing balance using the [client software](#) installed on Metropolia workstations or at papercut.metropolia.fi.
